

Job opportunity: Predoctoral researcher in Paediatric Endocrinology

Ghent University & Ghent University Hospital

Deadline for applications: April 20, 2019 23:59

Department: GE35 – Internal Medicine and Paediatrics

Duration: 4 years

Degree: MD (you can also apply in the last year of your medical training)

Job occupation: 100%

Summary

Are you interested in (Paediatric) Endocrinology, ambitious and eager to work on your own scientific research project that will lead to a PhD?

We currently have a vacancy for a predoctoral researcher (4 years) at Ghent University and Ghent University Hospital, Department of Paediatric Endocrinology. Funding is secured for 4 years through a scientific research grant from the Flanders Research Foundation (FWO). To qualify for this position, you must have a degree of MD or be in the last year of your medical training. Preferably you have already some research experience and/or have a profound interest in (Paediatric) Endocrinology.

Title of the research project: “Alteration of the sexually dimorphic phenotype by early puberty suppression and cross-sex hormone therapy”

Interested?

We are looking forward to hear from you!

Send us your CV and a letter stating your motivation before 20/04/2019
