

Role of Panel Manager

The Panel Manager (PM) has quite some similarities with the Panel Lead, but there are some differences.

The PM role focuses mainly on monitoring the panel performance.

The PM can:

- transition the workflow
- assist in panel selection
- schedule meetings
- monitor the requests for additional data
- record the contribution on behalf of the Panel Lead

The PM cannot:

- edit the data in the consultation form
- record an outcome
- sign-off the panel outcome document

HCP Panel Manager: is assigned by a centre to look after all panel originated from this particular centre to one or multiple ERNs.

ERN Panel Manager: is assigned to a specific panel by the ERN Coordinator or the ERN Dispatcher.
