---

### Actions Taken or Agreed To Be Taken

- **New ePAG Introduction:** Marta Barańska introduced as the new ePAG for pituitary, focusing on Cushing's disease. Collaboration with Diana Vitali and Johan de Graaf to be discussed.
- **Data Submission for Continuous Monitoring:** Acknowledgment of efforts made by centers to submit data, including challenges in making the process more automatic.
- **CPMS 2.0 Update:** Greta Ginski provided updates on the transition to the new system. Discussion around hospital data protection approval and user roles (clinicians, non-ERN clinicians, assistants). Attendees were encouraged to update their expertise in the system for better case assignment.
- **Registry Project Update:** Loren van der Hoeven discussed ongoing studies involving the Panomen grading score and transcription factors in non-functioning pituitary adenomas. Mention of a planned meeting during the ESPE-ECE Joint Congress for preliminary data presentation.
- **Webinar Planning:** Planned webinars include:
  - Cushing webinar by Evangelia Charmandari (June 2, 2025).
  - Congenital hypopituitarism by Kristensen (June 25, 2025)
  - Goal: Three webinars to be organized per year.
  - Call for topics and volunteers to organize webinars.
- **Guideline Development:** Decision to shift guideline focus to congenital hyperpituitarism, with emphasis on pediatric transition. Collaboration with Charlotte Gaasterland for methodology and further discussions during the General Assembly.
- **General Assembly Preparation:** Suggestions requested for topics to be discussed.

---

### Next Steps MTG6 Chairs/ePAG/endoERN

- Marta Barańska, Diana Vitali, and Johan de Graaf to discuss distribution of tasks for EPAGs.
  - Chairs/ EndoERN: Continue development of the guideline on congenital hypopituitarism
-

# Meeting minutes

- Further discussion on registry approval processes.

---

## Action points for HCPs

- Request for ideas to fill the space at the MTG 6 meeting during the GA
- Ideas for webinar topics
- Centers interested in the registry study to contact Loren van der Hoeven or Alberto Pereira.
- Attendees to update expertise in CPMS 2.0 for accurate assignment.

---

## Next Meeting Date and Time

- To be confirmed during the General Assembly in Copenhagen – 09&10.05.2025
-
